The Pilot

Write your intentions

Self-test

What do you see?

Who am I?

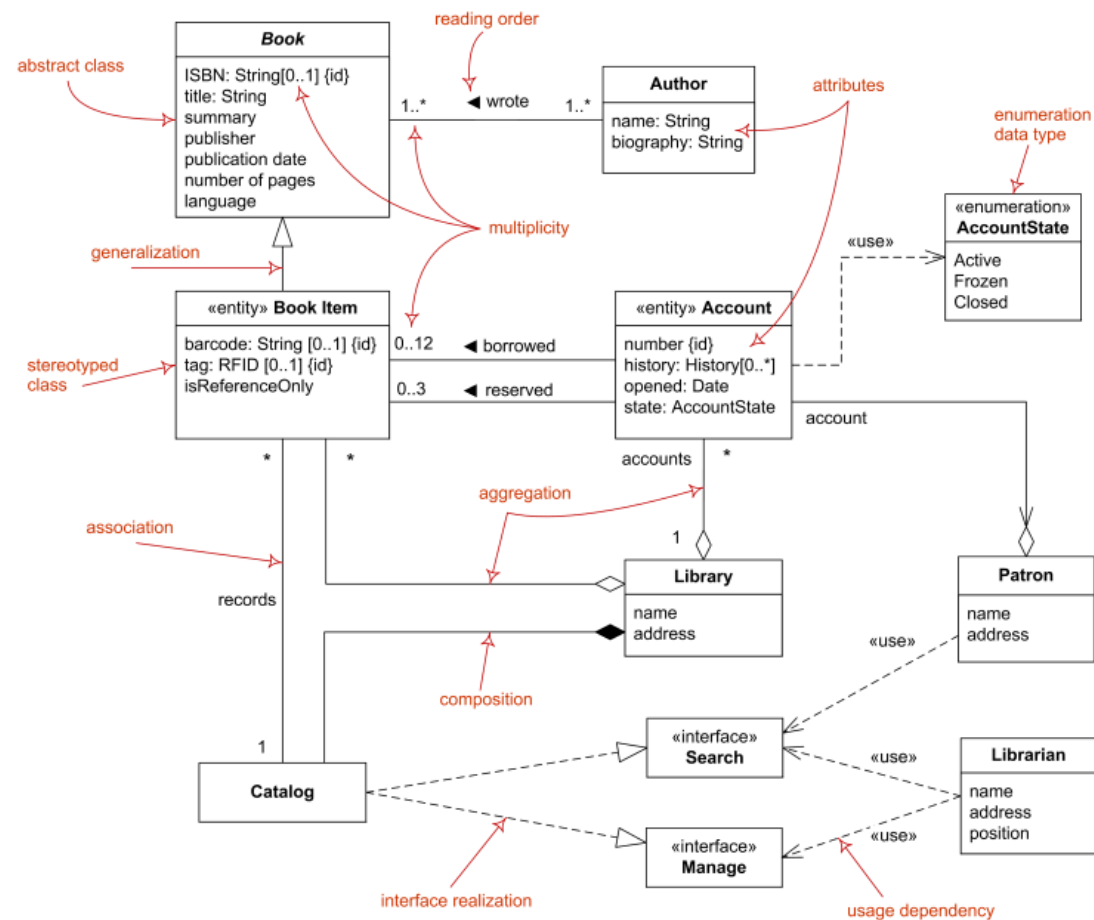

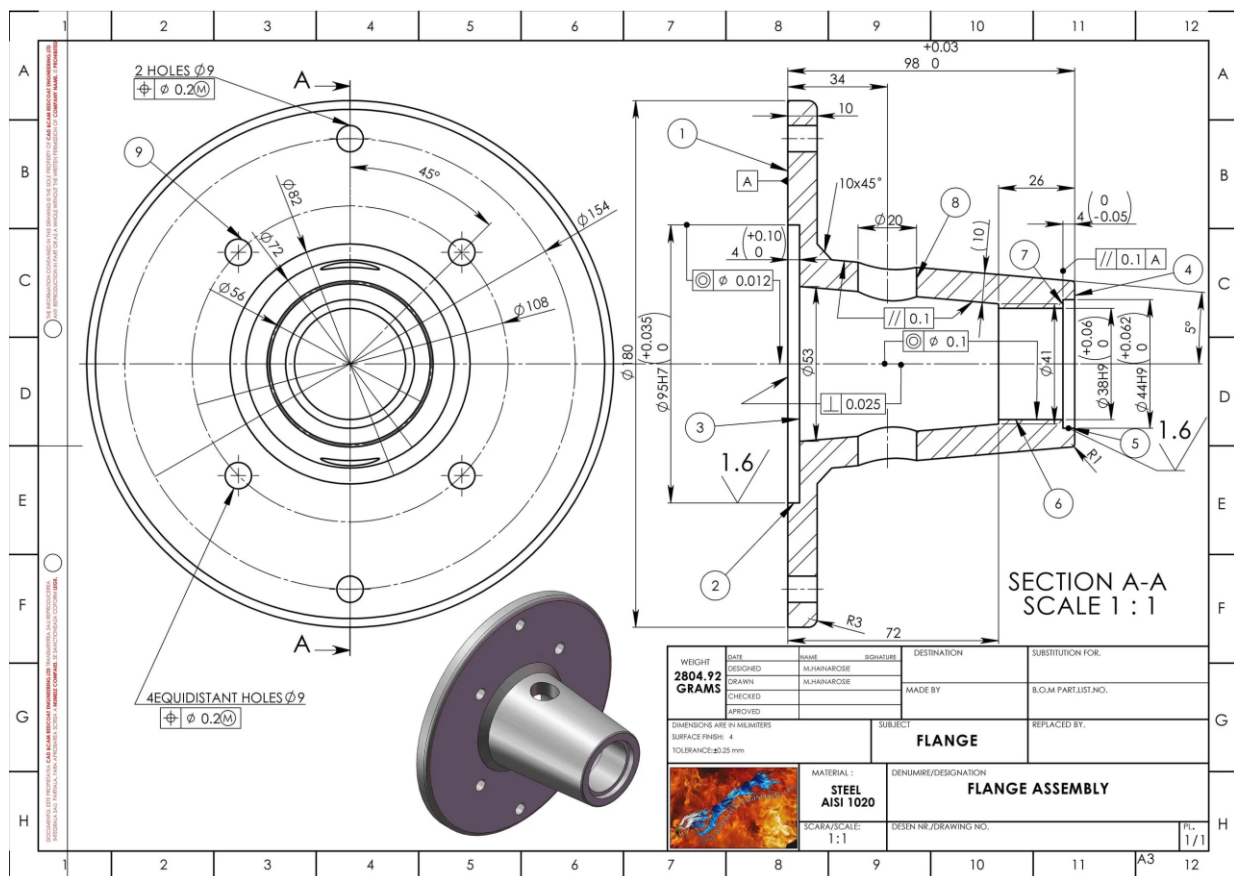

The one who will transform you in the consumer solution space where you will be able to

1. Be insightful of consumption
2. Model consumption
3. Map solution spaces
4. Build solutions

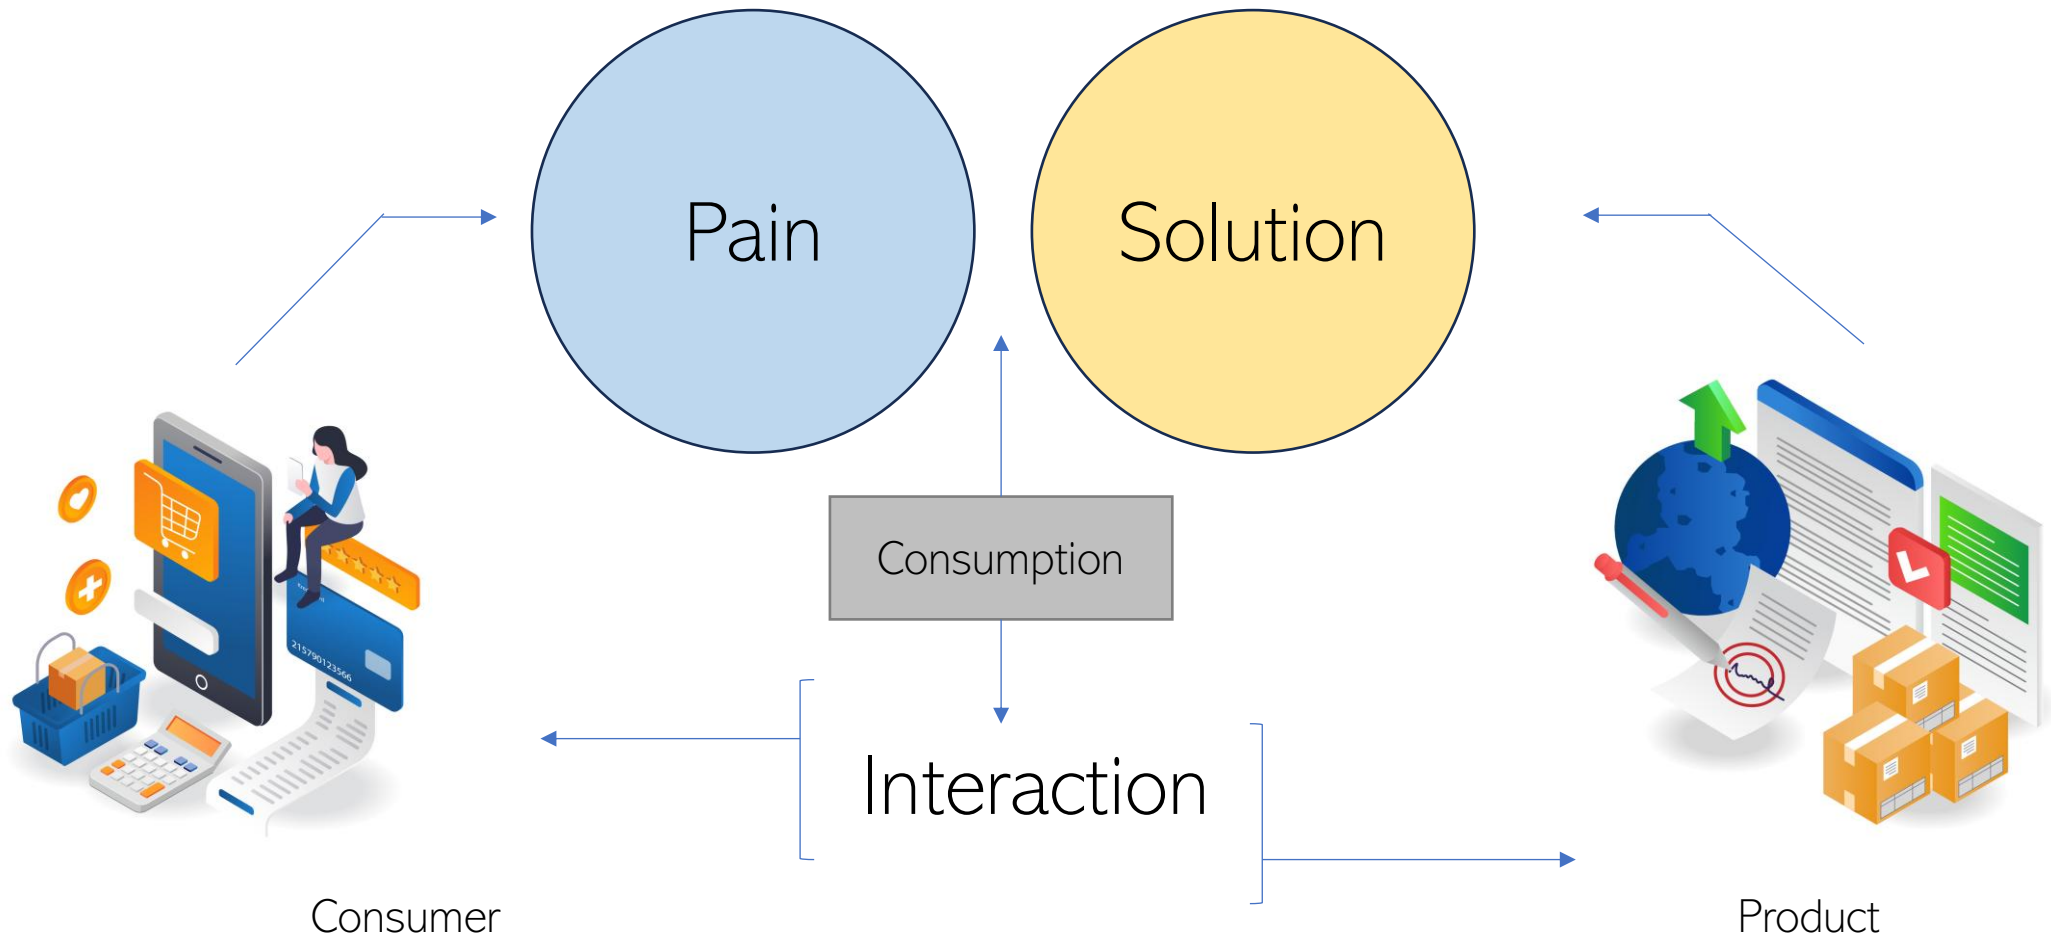

What is solution designing

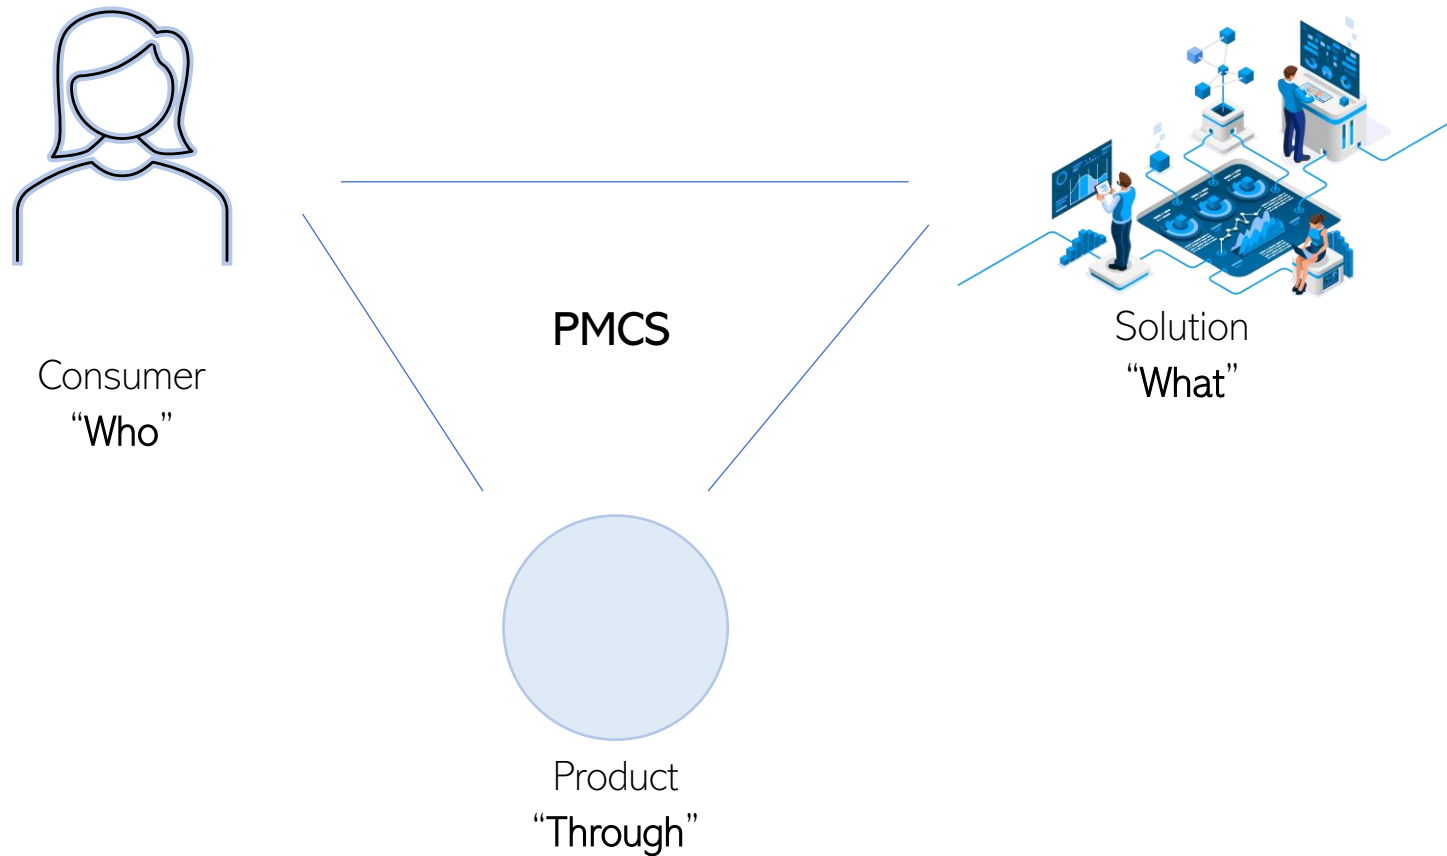

Solution designing is NOT about;

What we need to understand

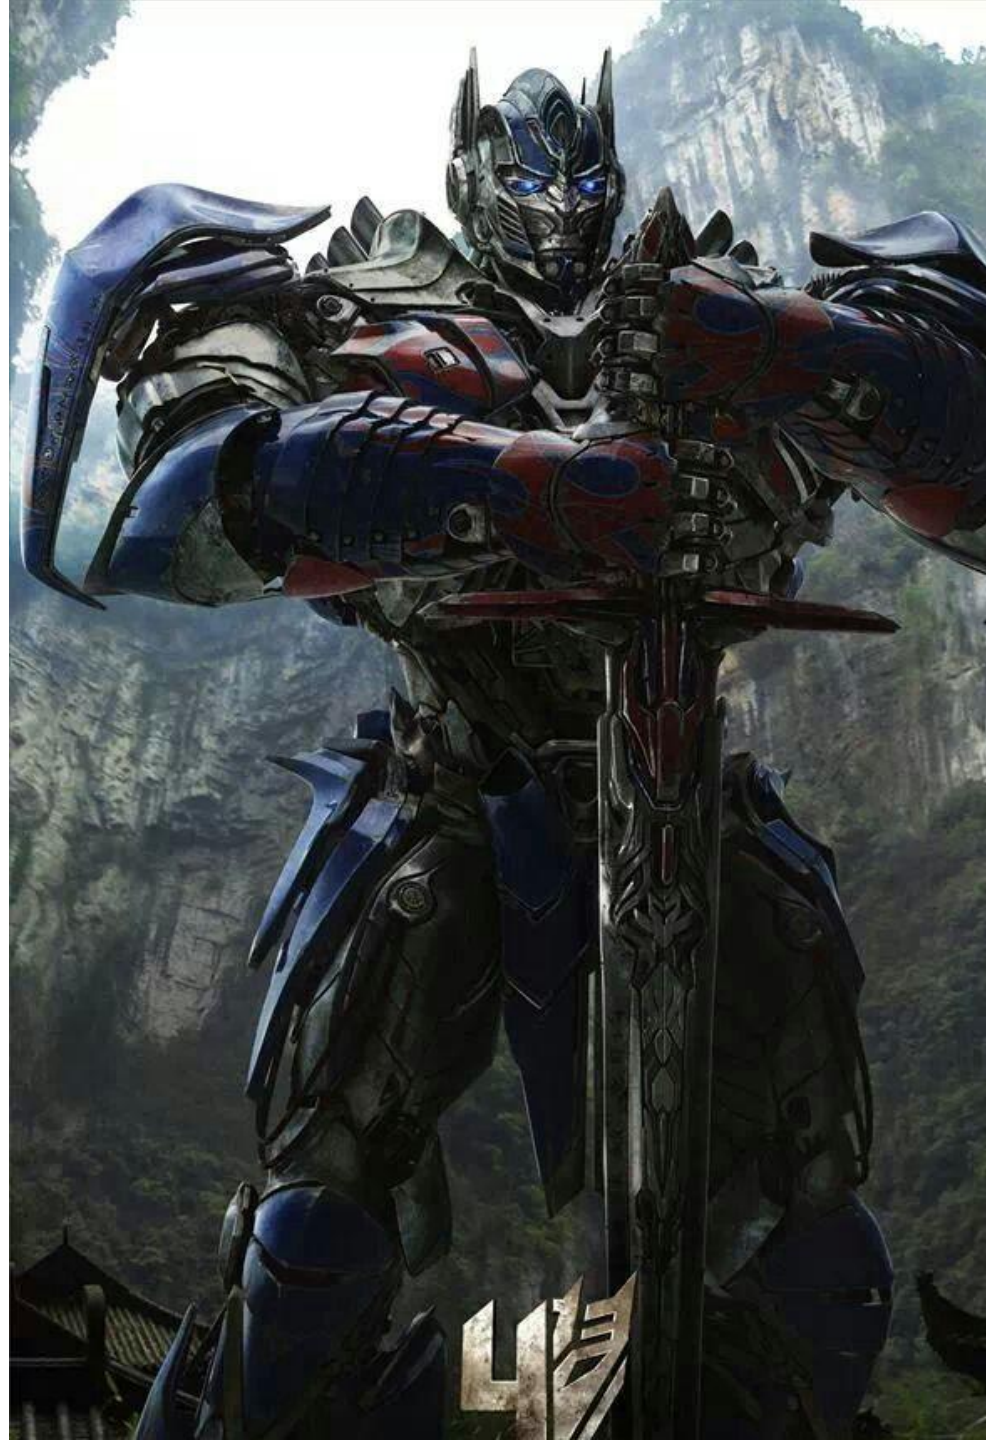

The triangle: coverage of the subject

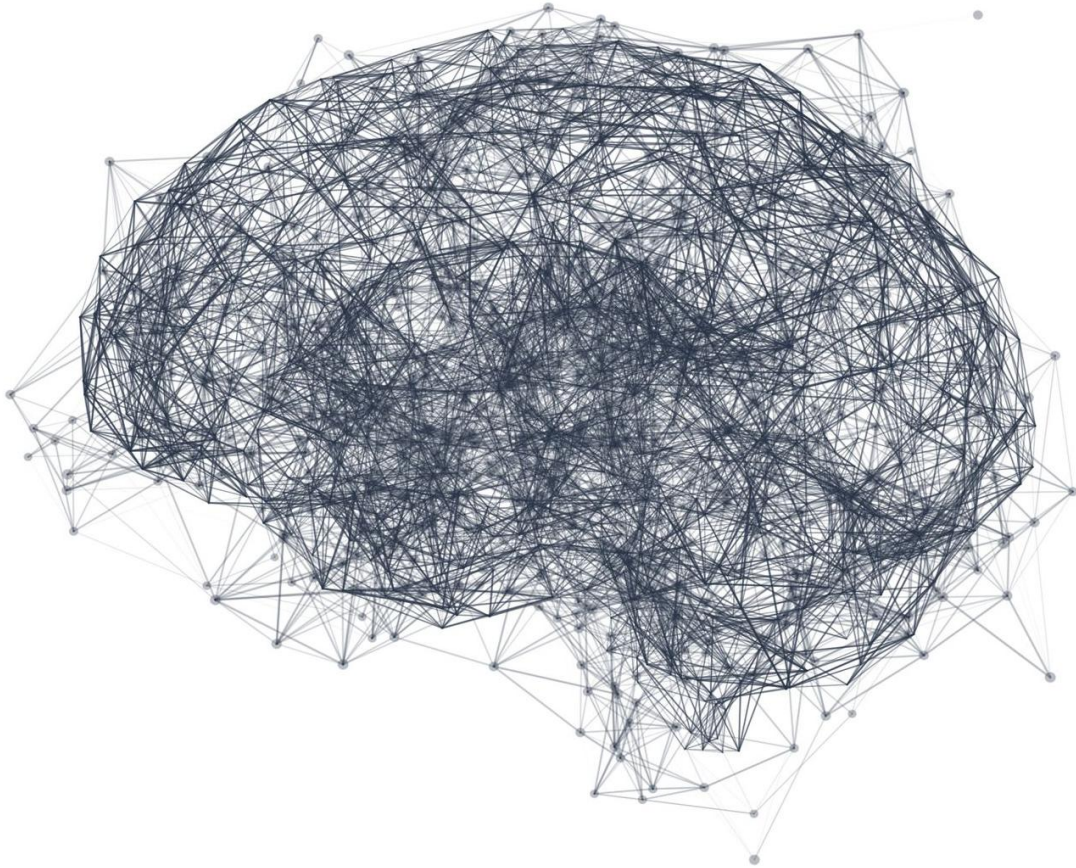

What should happen to *you*?

Transform

1. Consumptions
2. Solution elementary compositions
3. Abstract - concrete existence
4. Multi-level interaction
5. Solution thinking
6. Realizations
7. Nonuniformity (for segmenting)

Thinking

1. Consumption spec
2. Solution space modeling
3. Product spec
4. Segmenting
5. Branding

Skills

The Context

The course module focuses on consumption and solution designing in the technology landscape.

Questions

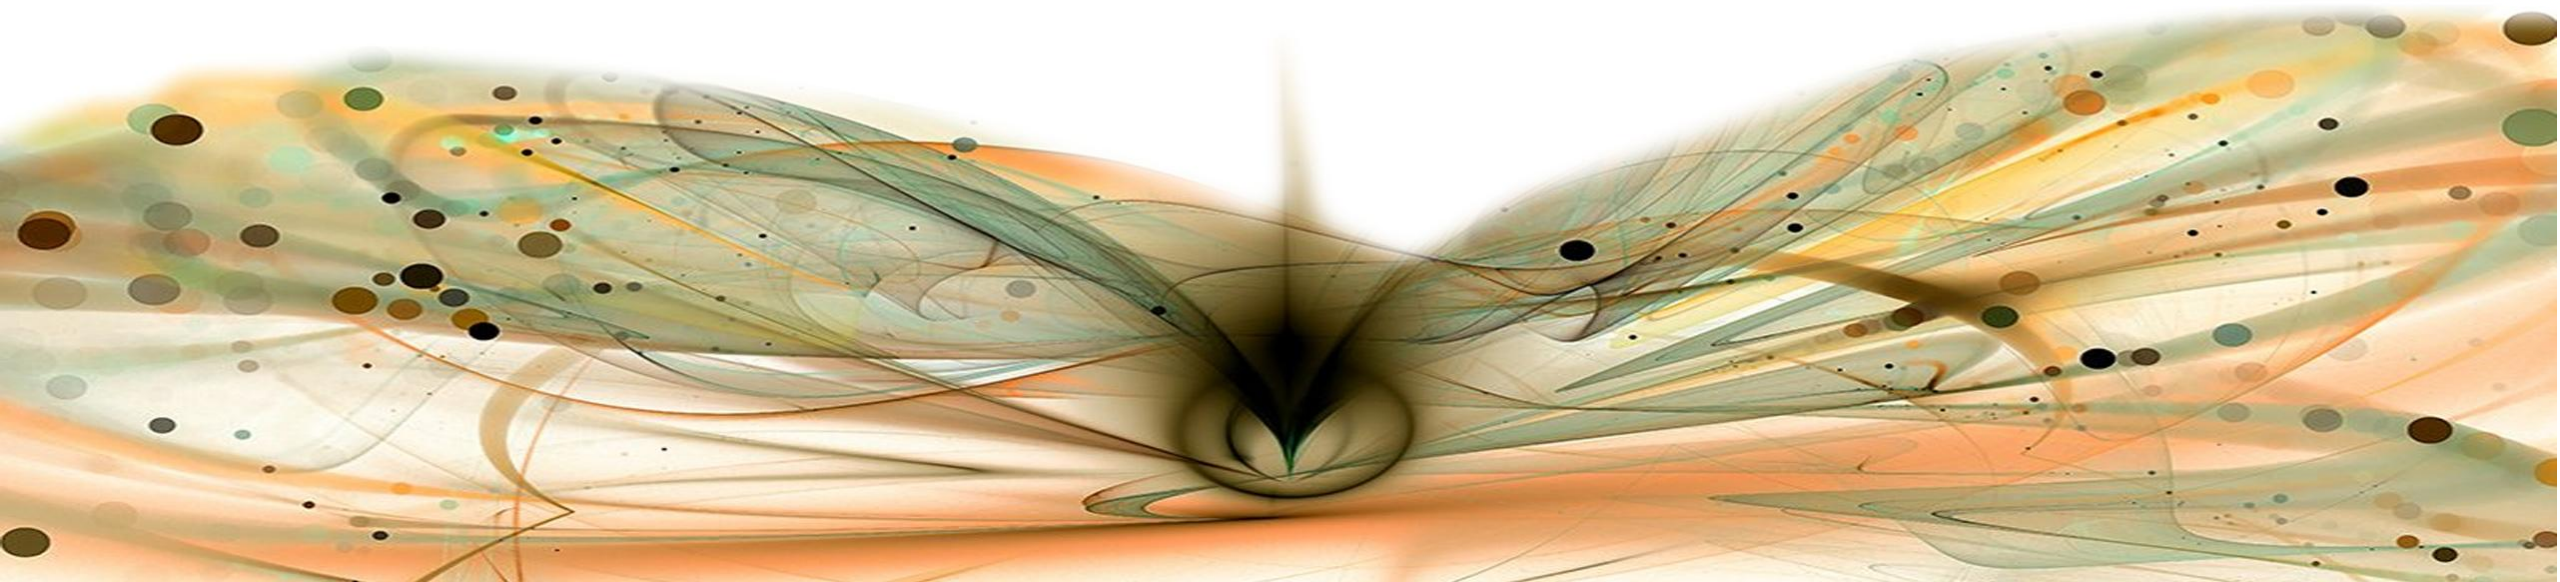

- Why do people buy what they buy?
- What do people consume?
- How do people consume?
- A solution is composed of what?
- What makes a product a product?
- Why are some products successful and why are some failures?
(Anchoring around positioned features)
- What do we need to do when designing consumer solutions?
- What do I need to know before starting to code a system beyond technology?

Transformation trackers

(Assessments)

- See through consumption beyond day-to-day activities.
- Model the consumption.
- Ability to decompose a product in the solution space.
- Ability to associate the differences in realization according to the differences in consumption.
- Carrying out elementary-level product analysis in technology solutions.
- Carrying out solution improvements.

Knowledge

Course Contents

- Philosophy of marketing and its contemporary position
- Introduction to strategic and tactical marketing
- Fundamentals of market compositions
- The process of consumption
- Basics of consumer value
- Basics of consumer solutions
- Customer buying behavior (individual and business buyers)

[cont...]

- Bases of segmentation
- Solution positioning
- Basics of branding and value accumulation
- New product developments and product life cycle
- Customer expectation management
- Sustainable societies and socially responsible marketing

Assessment

- In-class activities
 - Attending tutorial classes is mandatory
- Mid-term quiz
- Final group assignment
