

Market and Consumption

today's transformers

Thinking

- Penetration of products
- Conduction-deconstruction dynamics
- Signifying consumption drivers

Skill

- Framing consumption
- Relating interaction and consumption
- Consumption descriptors of products

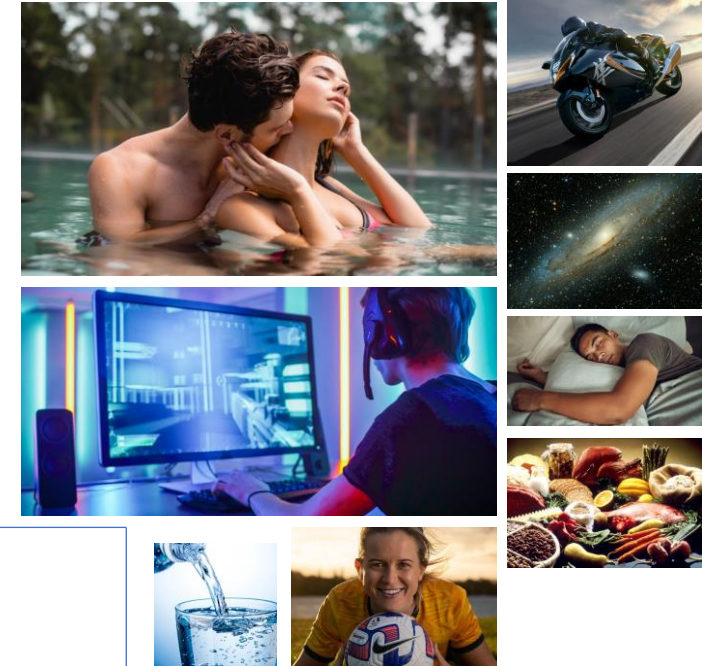

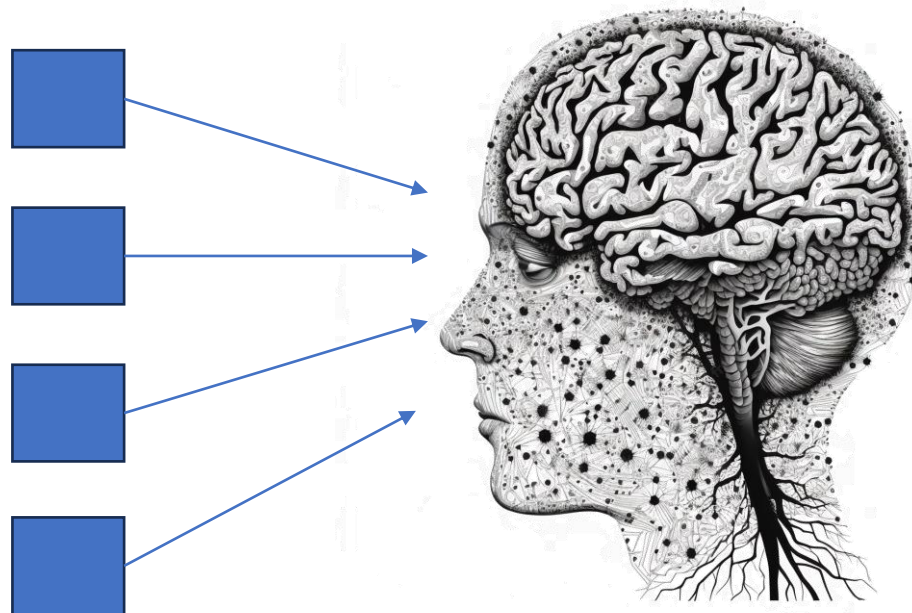

what's going on here

SOR model realization

Consumption

constructs of consumption

- Psychological Equilibrium

Hypothetical point at which a state of the balance of cognitions is achieved.

- Deprivation

Felt dissonance by the inconsistency between cognitions that define “*current state*” and cognitions that define “*equilibrium*”

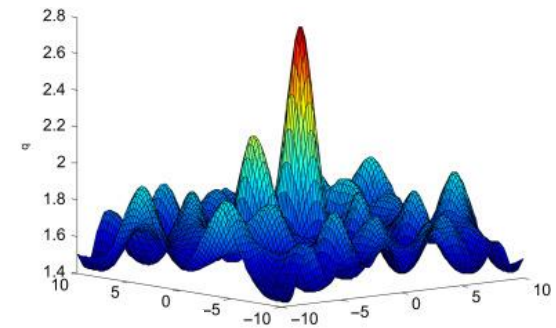

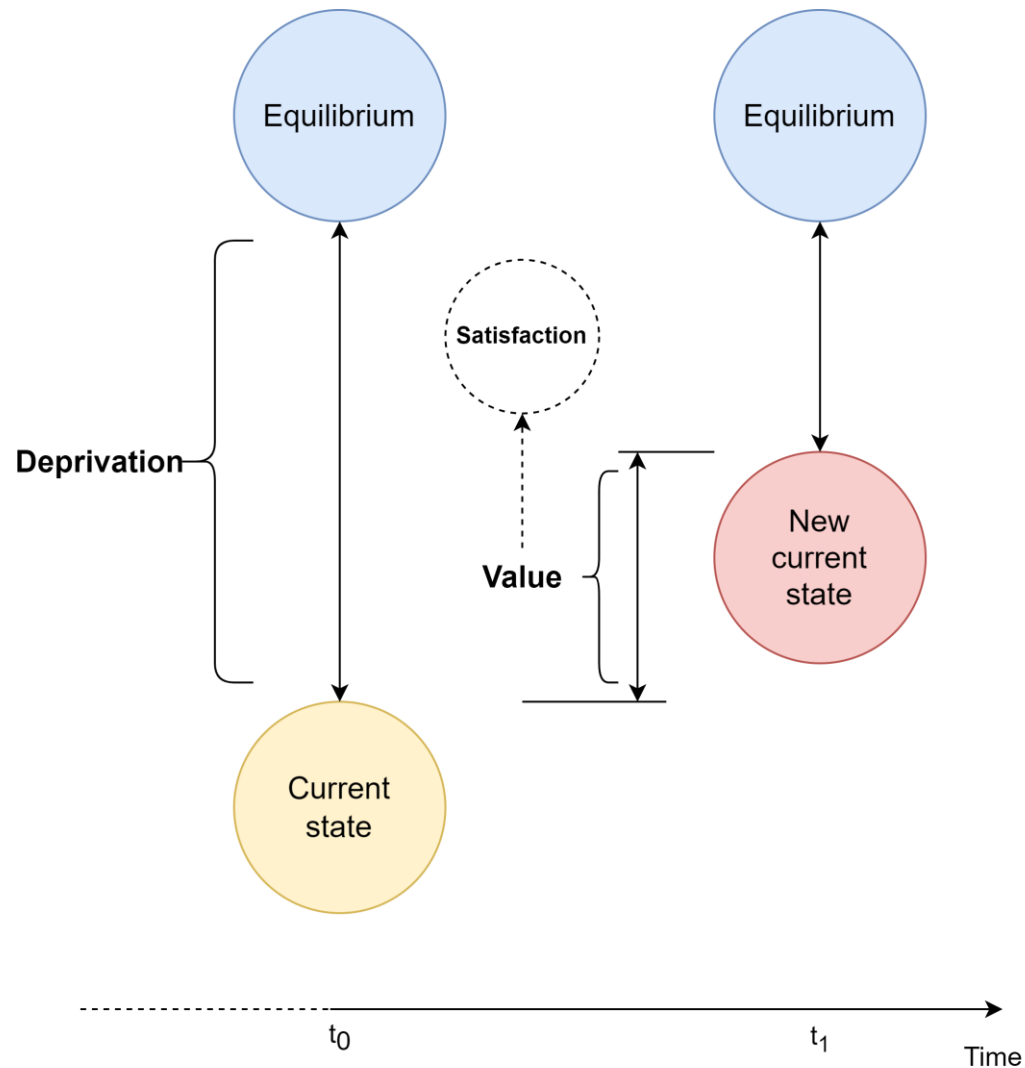

- Value

Reduction in tension created by deprivation

- Satisfaction

Affect state felt by the consumer due to value

fabric of consumption

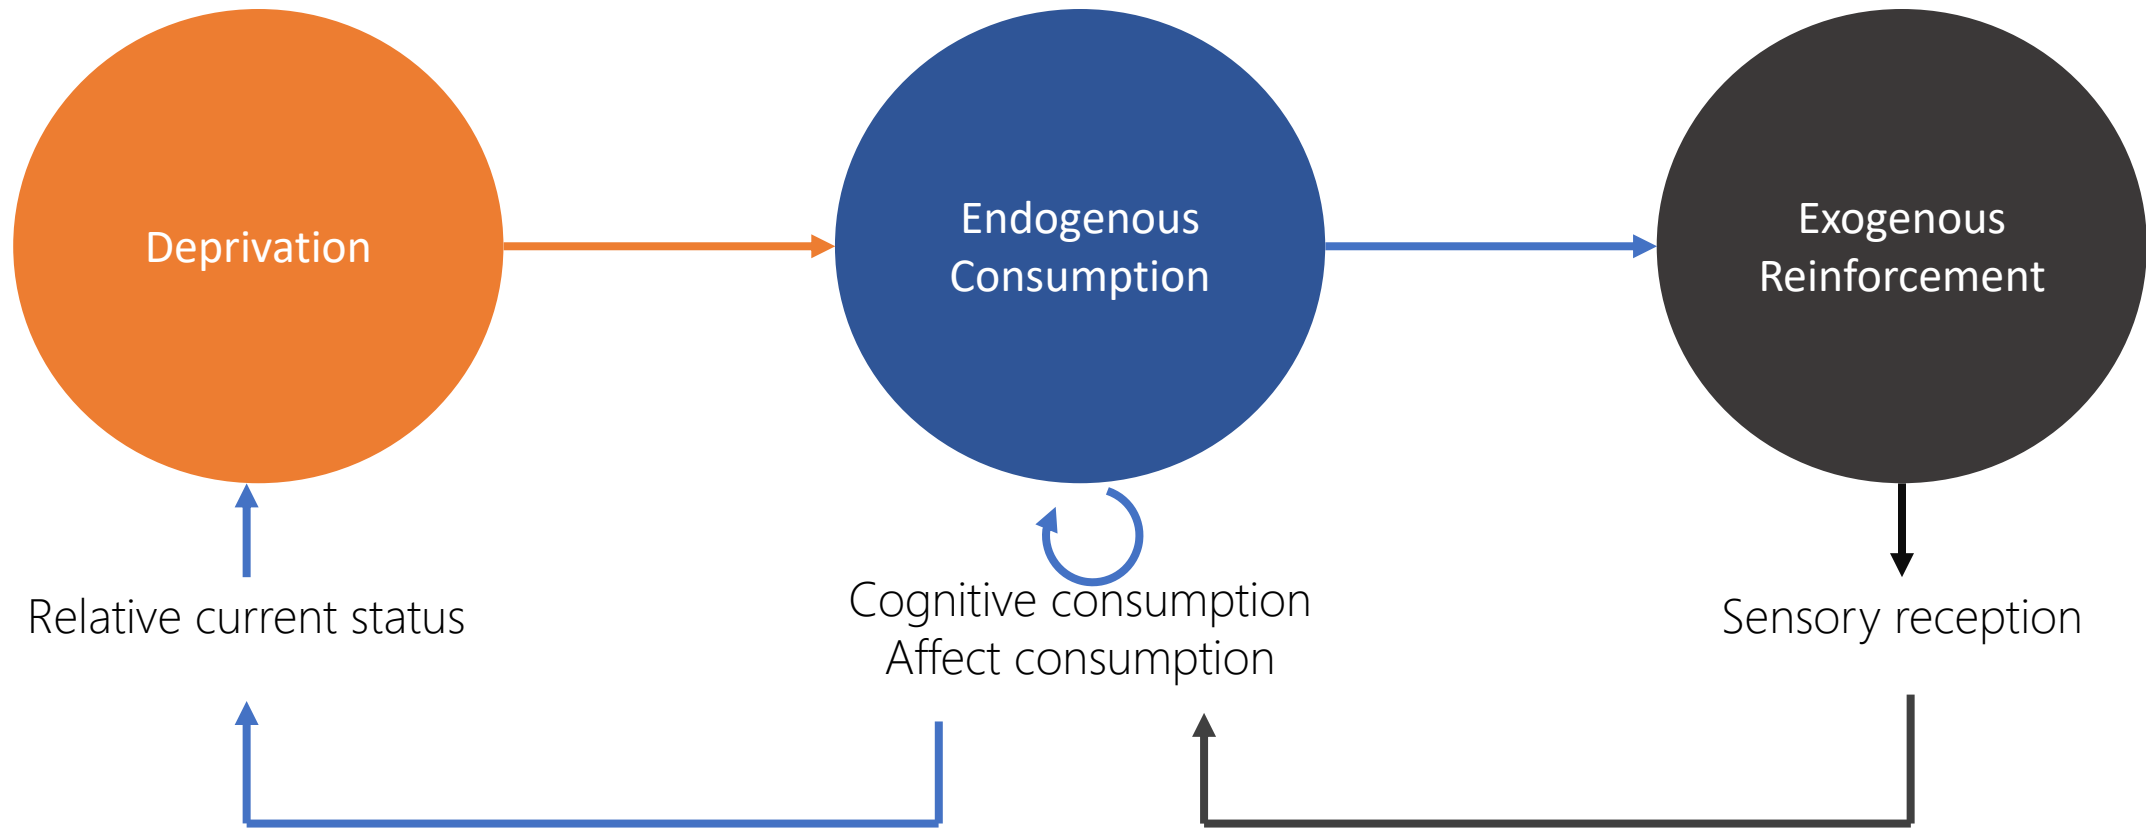

Equilibrium displacement due to change consumption and the other context factors

consumption

Process of reducing the felt deprivation by narrowing down the gaps between the associated psychological equilibriums and the current affect states.

consumption cycle

tri-core of consumption

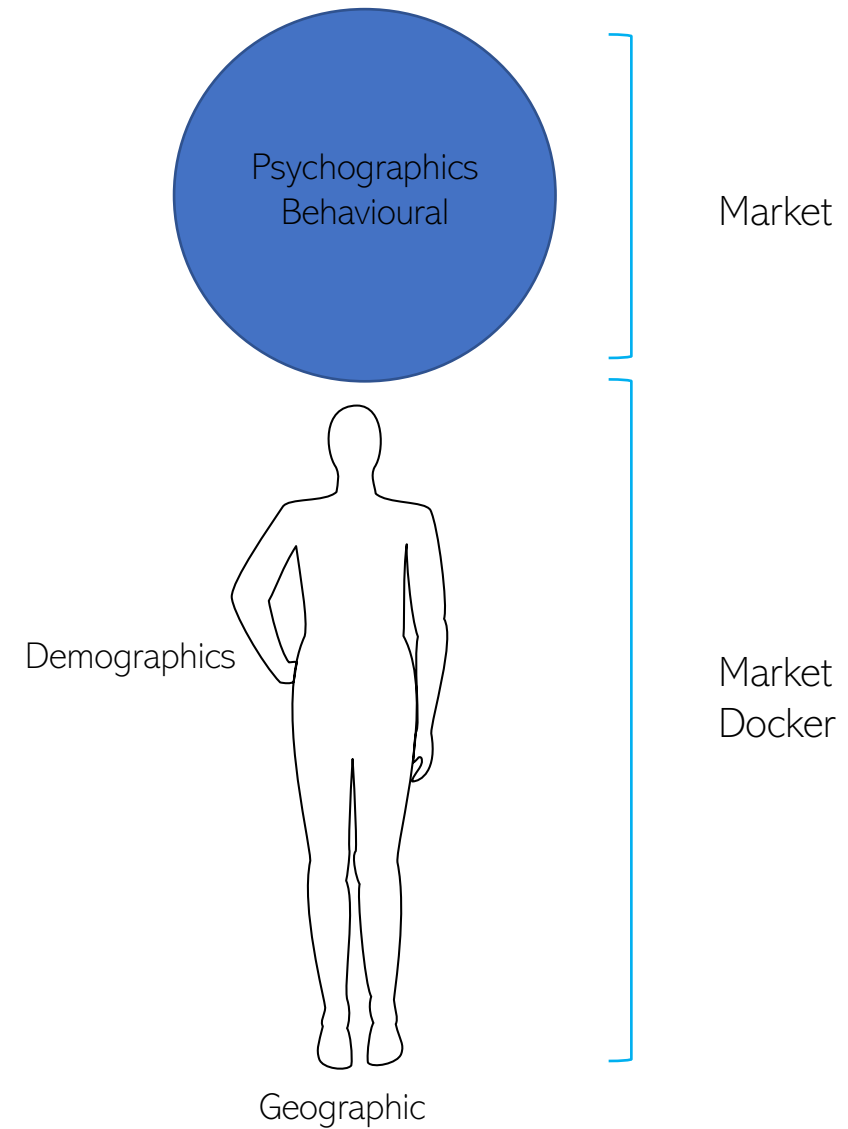

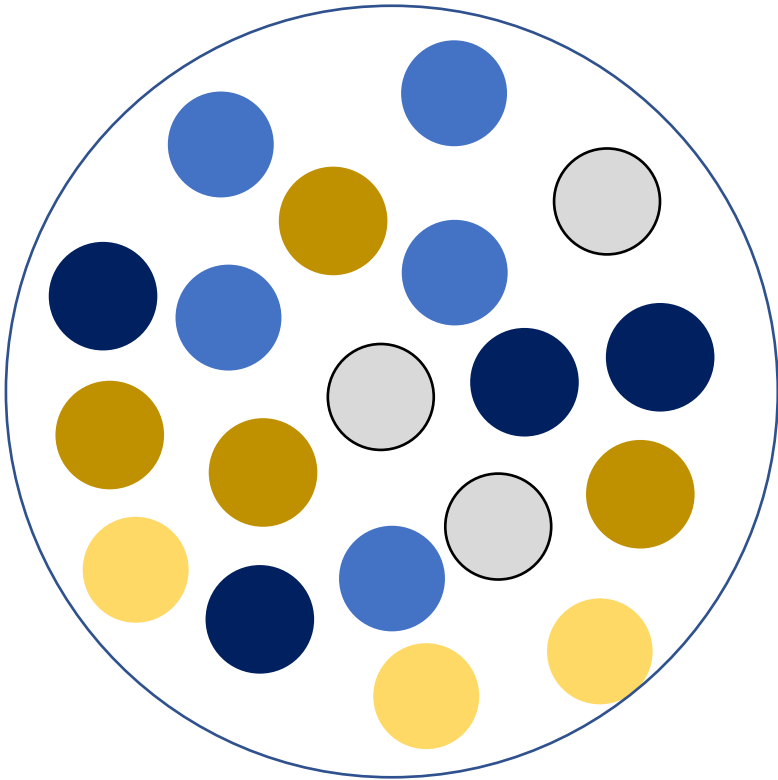

Market

what is the **market** and
where can you find them?

Collection of Similar
cognitive and affect states

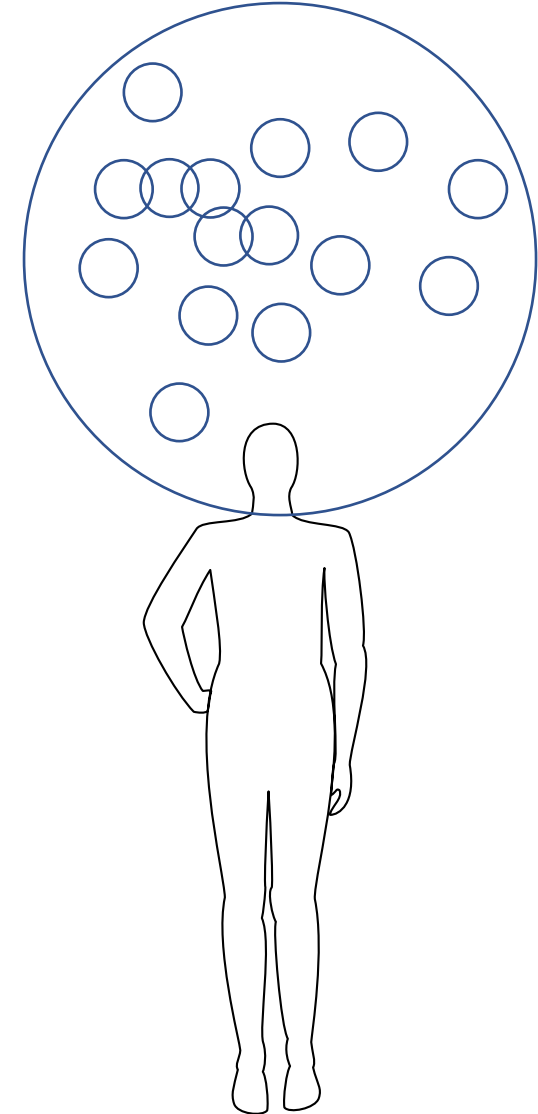

Market vs Container

- Market is similar collection of cognitive and affect states
- Inside a consumer, multiple markets exists
- So the consumer / person is the container for all those markets
- When considering a market, multiple market containers exists

**Business
Segment having
many containers**

**Markets inside a
docker**

consumer market dynamics

- Markets are constructed and deconstructed with every consumption cycle.
- Therefore, previously constructed markets do not ensure the continuity
- Next market going to be created may not be your business's

did you know?

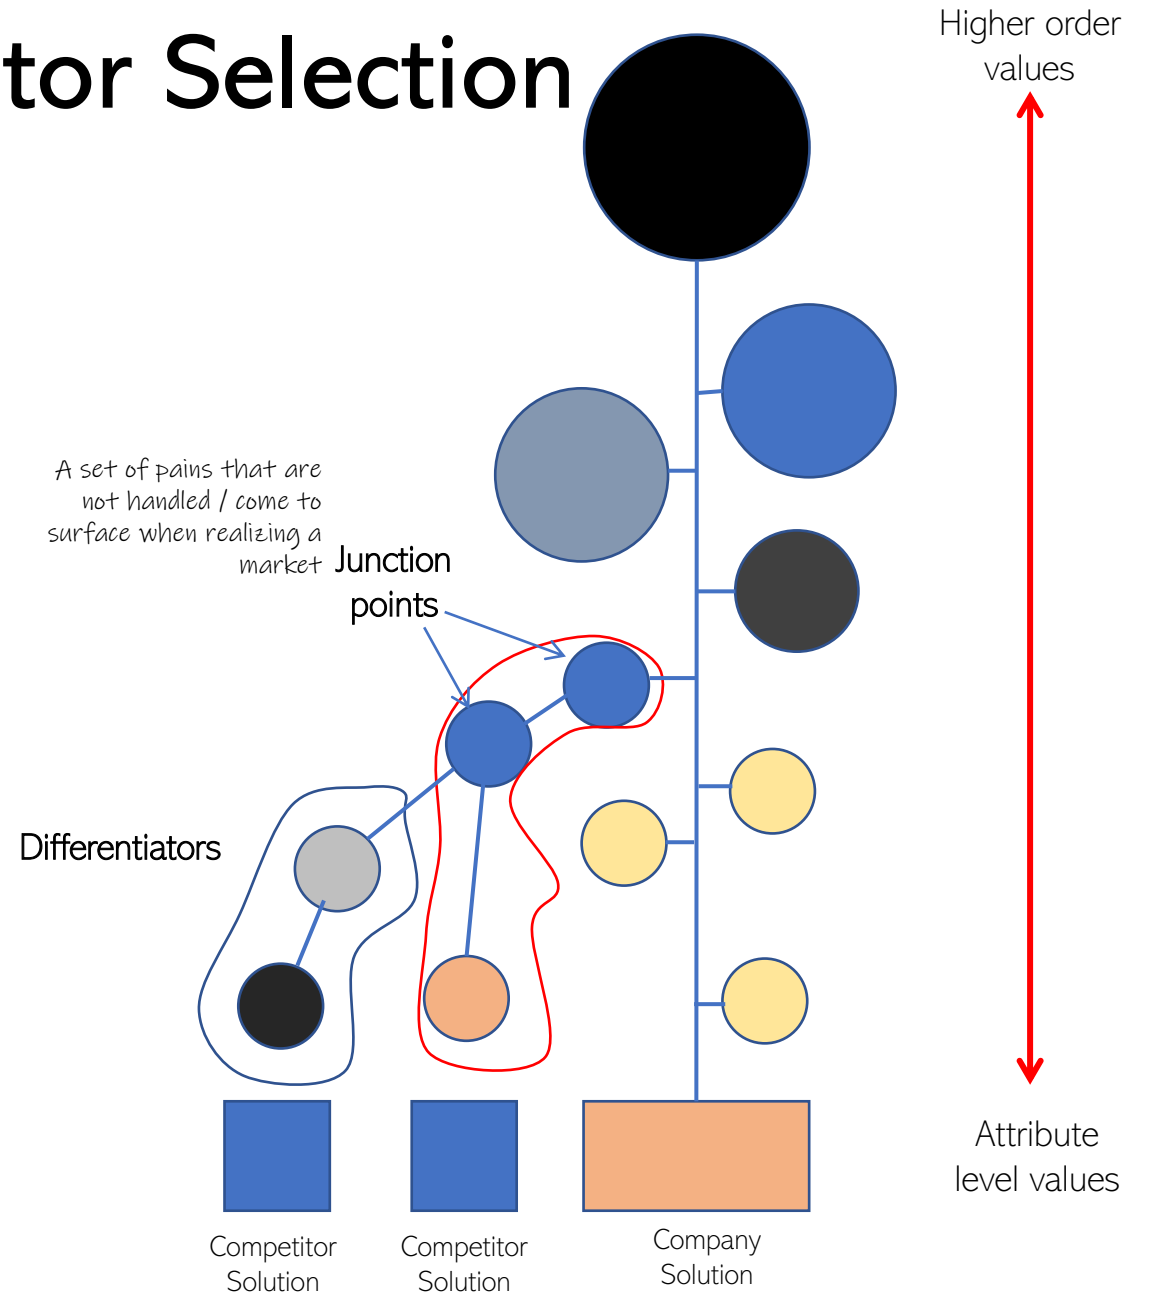

Every bite of a pizza is a realization of the market, and the next bite is determined by another realization of the same market. This is the market construction and deconstruction process.

Consumption and Competitor Selection

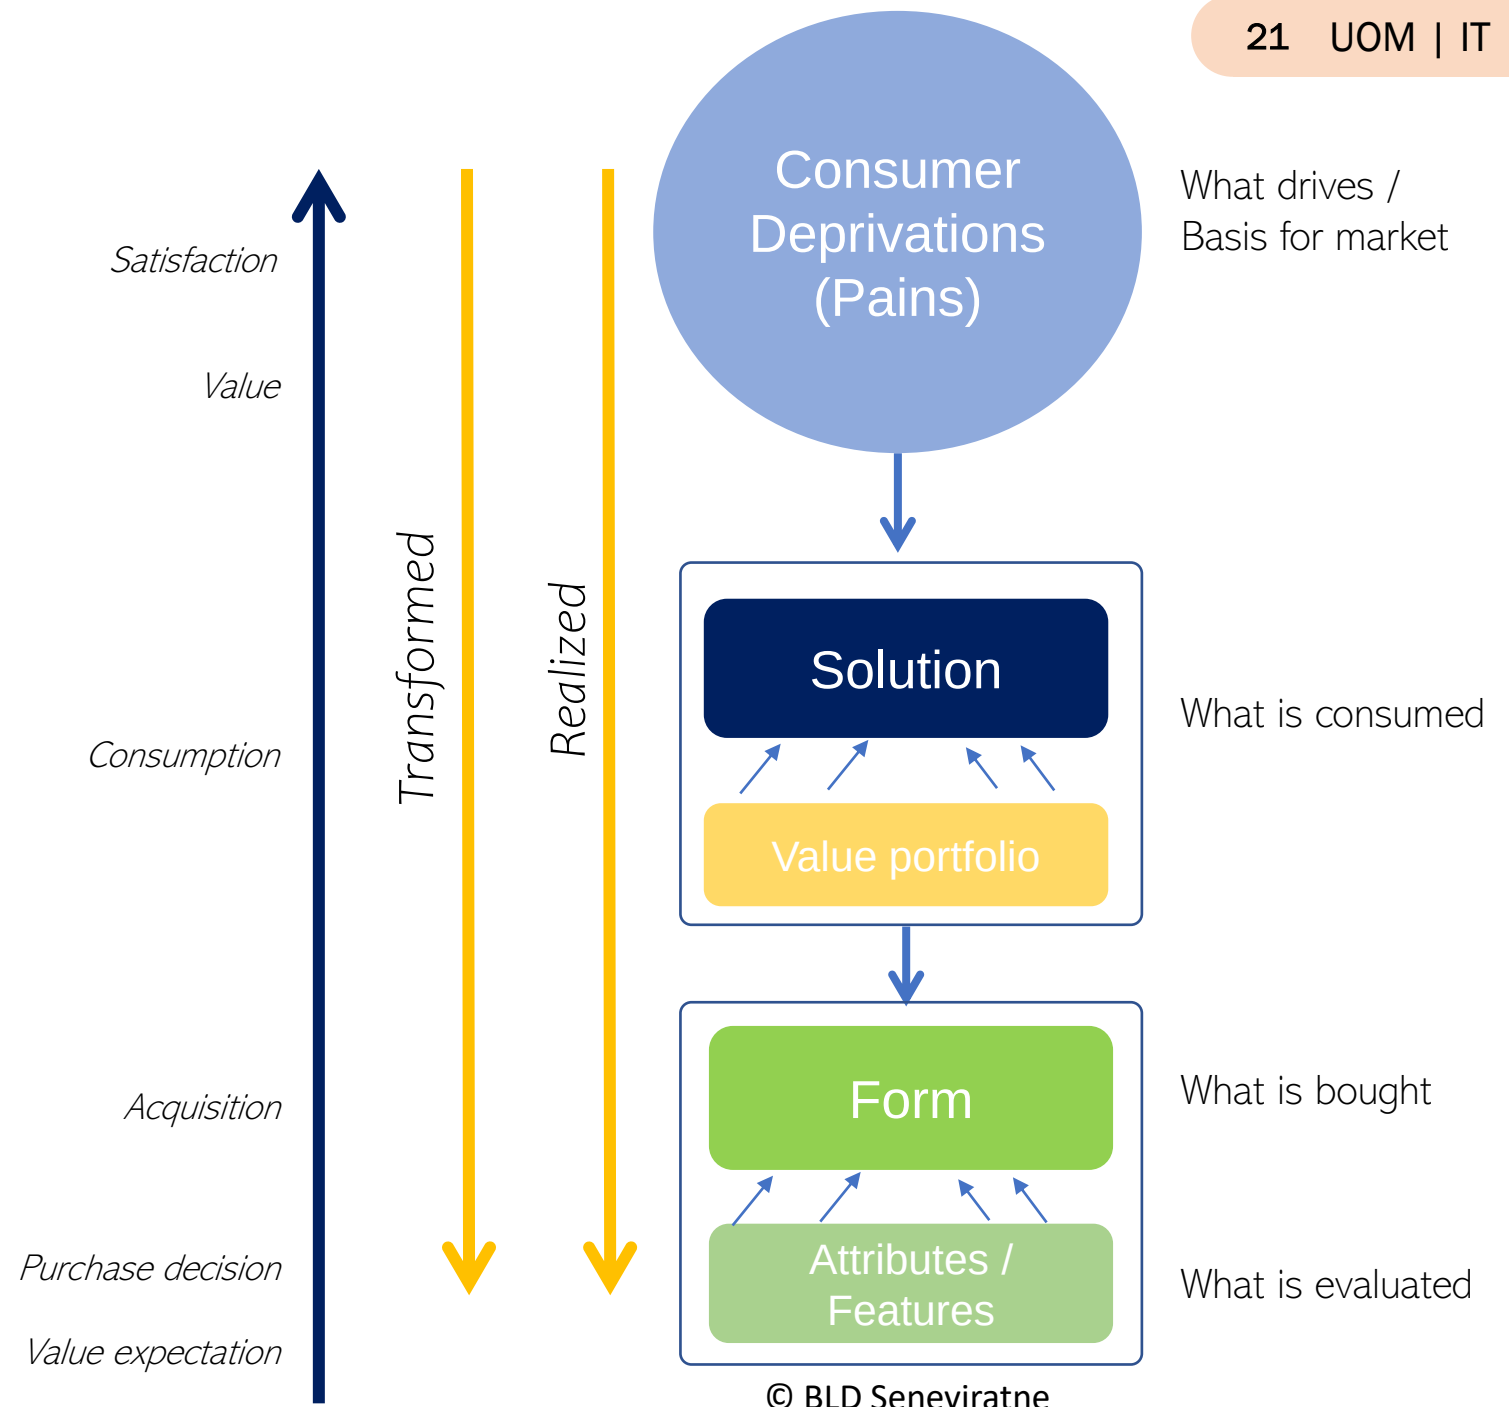

- Understand the competition with the consumer choice.

Value elements $\leftrightarrow$ pain elements

- It is a path of pains being associated and the values being linked in the process of market realization.

Transformation Process
